## Microwave Ovens

 **ABSOCOLD**  
A DIVISION OF INDOFF INC.

*Absolutely The One-Stop Solution For Compact and Major Appliances*

# MICROWAVE OVENS

The Absocold microwave from Daewoo may be compact in size but it is packed with features. With convenient electronic touch-pad controls, ten power levels, one-touch cook pads and auto defrost selections, this microwave provides high-end features but in a smaller space-saving design. The removable glass turntable aids microwave distribution for even cooking, while accepting items as large as a 11" dinner plate.

For Cook 'N Cool® microwave/refrigerator-freezer combination appliances, our microwave Internal Power Allocator (IPA) system prevents overloaded electrical system when the microwave and refrigerator-freezer are being used at the same time.

Need a simple solution to help prevent microwave fires and false alarms? The safe-T-sensor™ by Pioneering Technology was created to substantially reduce fire alarm activations caused by microwave ovens, interrupting power to the microwave at the first sign of smoke. The safe-T-sensor™ is truly the simple solution.

## 0.9 cu.ft. Microwave Oven With Internal Power Allocator Technology From Daewoo

AM090DWIPA (White)  
AM090DBIPA (Black)

AM090DWIPA

## 0.9 cu.ft. Microwave Oven From Daewoo

AM090DB (Black)

AM090DB

Our AM090DB microwave oven offers all of the same features and reliability of the IPA model except for the Internal Power Allocator. This is for use as a stand alone unit and includes convenient electronic touch-pad controls, ten power levels, one-touch cook pads and auto defrost selections.

KOR-760EB

## 0.7 cu.ft. Microwave Oven From Daewoo

If space is an issue, the 0.7 cu. ft. is the perfect option. It provides all the great features of the larger model with a smaller footprint. The KOR-760EB comes with 10 power cooking levels, 6 auto cook menu, auto defrost menu and child-safety lock system.

### What Is Interval Power Allocator Technology?

Our microwave with Internal Power Allocator Technology prevents an overloaded electrical system when the microwave and refrigerator/freezer are operating on the same circuit. Maximum operating amperage at 100% power: 11.3 Amps
