

## Absocold Quick Chill 'N Snooze®

The Absocold Suite Fridge line of commercial hospitality refrigerators come with our proprietary Quick Chill 'N Snooze® feature.

### SNOOZE Feature

For guests that are noise sensitive, Absocold has developed the SNOOZE option that will turn off the Suite Fridge compressor for a period of 8 hours. After that period of time, the compressor will automatically turn back on and resume normal operation.

How to activate the SNOOZE feature:

1. Push the SNOOZE button once. The Red Light appears when it is activate.
2. The refrigerator will be off for 8 hours.
3. During this period, the temperature of the refrigerator will rise, but once 8 hours has passed it will start back up automatically.
4. To deactivate or cancel the SNOOZE function, simply push the SNOOZE button again.

### QUICK CHILL Feature

For guests who would like to quickly chill items in the refrigerator, Absocold's QUICK CHILL feature is the perfect option.

How to activate the QUICK CHILL feature:

1. Push the QUICK CHILL button once. A green light appears when it is activated.
2. The refrigerator's compressor will operate continually for 2 hours. After that period, the refrigerator will return to normal operation. This function cools beverages faster than normal operation.
3. To deactivate or cancel QUICK CHILL function, simply push QUICK CHILL button again.

If you have any additional questions on the Absocold Quick Chill 'N Snooze or the Suite Fridge line of hospitality refrigerators, please contact Matt Munchel at 800-843-3714 (1409) or by email at [matt.munchel@absocold.com](mailto:matt.munchel@absocold.com).
